DEFINITION			
<i>Name</i>	Websense Enterprise Web Filtering Software		
<i>Description</i>	Websense Enterprise is a software tool that protects organizations and employees who use the Internet from a growing number of threats by filtering Web sites as set by agency guidelines. Websense Enterprise includes reporting tools and a customizable database of pre-defined categories of filtered Web sites/content.		
<i>Rationale</i>	<ul style="list-style-type: none"> Internet misuse at work costs Missouri state government in lost productivity. Although agencies use anti-virus software, many of them continue to be hit by viruses, worms, or other malicious applications. High-bandwidth applications, including instant messaging, downloading music, and watching video clips during work hours exhaust State of Missouri financial/network resources. 		
<i>Benefits</i>	Websense Enterprise: <ul style="list-style-type: none"> improves employee productivity; enhances security; reduces legal liability; optimizes the use of IT resources; integrates with leading network infrastructure products; provides flexibility and control for Web site filtering; and provides reporting on Internet and as an option (add-on feature) can report on desktop application activity.
